

MEMORANDUM FOR: DCI

Approved For Release 2007/04/05 : CIA-RDP83T00966R000100080029-2

Here is an up-to-date accounting of where we stand on our estimates production plans, per your request to [redacted] before you left on your trip.

We've given you our best guess as to which papers now underway will be done by the end of this year. We've also included papers we now plan to do next year; some are described as "tentative" since neither the DI nor NFIB is fully on board yet on those proposals.

As we did last time, we've included here not only those papers normally reviewed at NFIB (NIEs, SNIEs, and the occasional IIM), but also those that receive NFIB coordination only at the working level (the bulk of IIMs, IIAs) or are not coordinated outside the NIC at all (NIC Memos).

We invite your comments and suggestions on the list.

MEMORANDUM FOR:

25X1

FROM: DCI

SUBJECT: Estimates

Will you follow through as much as you can on the NIC's work in firming up the estimate schedule for the balance of this year and let me see what the year's production will look like when I return. Check the 82-83 products as laid out in these spread sheets against what we are likely to complete. There are some subjects in the spread sheets which do not appear on the NIC schedule perhaps because of a change in title, as from "Creeping imperialism"

25X1
